Early Intervention
Birth to 3-years

Early Intervention helps families who have a child with developmental delay or disability to enhance their child's development.

Why is Early Intervention Important?

Babies and toddlers are constantly learning. If your child has a developmental delay, or if you have questions about their development, your state's early intervention team may be able to help.

Who qualifies for Early Intervention?

- Children birth to 3 years old
- Low birth weight & newborn problems
- Diagnosed with a condition known to cause a developmental delay
- Developmental delay by 50% in at least one area
  - e.g., Cognitive, communication, adaptive, physical, or social/emotional development

How does Early Intervention help?

- Assesses the child's development to understand their needs
- Works with the family to set goals for the service plan
- Implements services to achieve developmental goals

Early Intervention Services may include:

- Assistive Technology
- Audiology
- Dietary/Nutrition Services
- Family Child Care Assistance
